

## AI Extension Server

### Overview

AI Browser Extension Interface Server enables AI systems to observe and control web browsers through a standardized HTTP API. The system synchronizes your physical browser with a virtual browser, allowing AI to see exactly what you see and act exactly like a human user. Code Server enables users to run Visual Studio Code (VS Code), a lightweight and versatile source code editor that combines the simplicity of a text editor with powerful developer tools, providing an intuitive and customizable environment for coding across various programming languages. Core Philosophy: "What the.

## AI Extension Server

Learn how to use the Microsoft.Extensions.AI libraries to integrate and interact with various AI services in your applications.

A comprehensive guide for developers building MCP servers that work with Visual Studio Code.

A step-by-step guide to creating a powerful, private AI coding assistant using Ollama and Continue extension in VS Code, with remote server capabilities.

The AltTester® AI extension works as an MCP server. MCP (Model Context Protocol) is a standardized way for AI applications to access external tools and data sources securely and efficiently.

☐☐ Turn your Chrome browser into your intelligent assistant - Let AI take control of your browser, transforming it into a powerful AI-controlled automation tool.

AI Browser Extension Interface Server enables AI systems to observe and control web browsers through a standardized HTTP API. The system synchronizes your physical browser with a ...

Code Server extends the capabilities of JupyterLab by providing a cloud-based IDE with GPU resources that enables efficient coding, collaboration, and development of ML models. It enables AI-users to ...

In VS Code, MCP servers provide tools for tasks like file operations, databases, or external APIs. Servers can also provide resources, prompts, and interactive applications.

Lemonade Server is a lightweight, open-source local LLM server that allows you to run and manage multiple AI applications on your local machine. It provides a simple CLI for managing applications ...

The Microsoft.Extensions.AI libraries provide a unified approach for representing generative AI components, and enable seamless integration and interoperability with various AI services.
