

Attenuation of China Unicom optical cable

Overview

Chinese state-owned telecom firms are developing a \$500 million undersea fiber-optic internet cable network that would link Asia, the Middle East and Europe to rival a similar U. -backed project, four people involved in the deal told Reuters. Hengtong, in collaboration with China Unicom, has successfully deployed and begun operating China Unicom's first commercial hollow-core fibre optic cable line. This hollow-core fibre cable is now serving a dedicated line for a bank branch in Jiangsu, where it has been integrated into the live. Recently, the first new global carrier "Large Effective Area Fiber" (LEAF) (ITU-T standard code G. HK, hereinafter. iples of moderate advancement, scientific planning, and coordinated development. 15 optical fiber and cable companies shared this large order of 65. 7859 million core kilometers of optical cable. Although the project was issued at the end of 2024, the bid will be opened in.
