

Cable tray specifications for Middle East engineering projects

Overview

This table reflects the common cable tray sizes specified for commercial and industrial projects across the UAE, Saudi Arabia, and the wider region. Standardising dimensions ensures better supplier availability, competitive pricing, and easier procurement of compatible. Middle East projects expose cable tray systems to extreme ambient temperatures, intense solar radiation, dust, and—often—coastal corrosion. When fire resistance is required, the “best” solution is rarely universal. 44 meters optional) in compliance with BS 61537:2002 for cable installations. For finishes, we adhere to BSEN ISO 1461:1999 for hot-dip galvanizing and BS EN 10327:2004 (formerly BS 2989).

Cable tray specifications for Middle East engineering projects

This table reflects the common cable tray sizes specified for commercial and industrial projects across the UAE, Saudi Arabia, and the wider region. Standardising dimensions ensures ...

This is especially important in industrial, utility, transport, and energy projects where tray routing, support spacing, corrosion resistance, fire performance, and installation details may all come ...

Middle East projects expose cable tray systems to extreme ambient temperatures, intense solar radiation, dust, and—often—coastal corrosion. When fire resistance is required, the ...

At Tamco Middle East Ltd, cable trays and their accessories are manufactured in standard lengths of 3 meters (2.44 meters optional) in compliance with BS 61537:2002 for cable installations.
