

## Can ONU be connected to a switch

### Overview

The ONU must connect to an OLT and can not connect directly to another ONU. There are other solutions to convert copper to fiber such as using a switch with both a copper and SFP port or a copper to SFP media converter such as the Ufiber Active Ethernet (UF-AE). An ONU, also known as an optical modem, is a device similar to a base band modem. It converts the digital signal to analog signal through modulation at the sending end, and converts the analog signal to digital signal for. ONU connects your fiber network to your LAN. Router manages your network traffic. It connects directly to the optical line terminal (OLT) at the central office and serves as the endpoint for fiber-optic signals in the user's premises.
