

Can a router be used when moving to a new fiber optic cable company

Overview

The good news: Fiber-optic internet does not require a special router in most cases. The key is making sure your router can actually handle fiber's performance. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. A standard cable or DSL modem's job is to convert electrical signals into digital data that your devices can understand. Not all routers can handle fiber.

Can a router be used when moving to a new fiber optic cable compa

Old equipment won't transfer: Cable modems, DSL modems, and their routers are not compatible with fiber. Before buying any hardware for a new fiber plan, confirm what your specific ...
