Chad Energy Internet

Chad Energy Internet

Chad's electricity sector continues to face structural constraints, with very low access levels and strong urban-rural disparities. National electricity access increased slightly from 10.9% (2017) to 12.0% (2023).

Find relevant information for Chad on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

The Chad Energy Access Scale Up project aims to boost access from about 6 percent today to 30 percent or about 1 million households by 2027, mostly by the private sector.

This assessment, developed by IRENA in partnership with the Ministry of Water and Energy, presents key recommendations to advance and accelerate the energy transition in Chad.

As a result, Chad's government is working to expand its electricity supply and encourage investment in the energy sector to stimulate the economy. Chad is endowed with the tenth-largest oil reserves in ...

By 2030, Chad expects to achieve an electricity access rate of 53% throughout the country and 20% in rural areas. The share of renewable energies should also increase to 20% of the energy mix.
