

Congo Telecom Fiber Optic Cable Construction

Overview

Genew Technologies and Zhongshi Wosen, both Chinese companies, will help the Democratic Republic of Congo (DRC) build its fiber optic network. The Central African Backbone (CAB) sub-regional project, born from the will of the heads of state of the CEMAC zone, aims to put digital technology at the service of the populations, by opening up the isolation of departments and promoting digital inclusion. The Congolese Minister of Telecoms, Augustin Maliba, signed the related memorandum of understanding (MoU) on April 7, 2025. "With the support of the. The Republic of Congo has embarked on a major project to construct a national data center in the Bacongo district of Brazzaville. This three-story facility will store and process the country's digital data, marking a significant step forward in the nation's digital transformation.
