

Costa Rica Fiber Optic Trunk Line

Overview

Limón, Costa Rica — LIMÓN - Costa Rica is poised for a significant leap in its digital capabilities as the TAM-1 submarine cable project, a strategic venture between Trans Americas Fiber System (TAFS) and the state-owned Instituto Costarricense de Electricidad (ICE), enters. Limón, Costa Rica — LIMÓN - Costa Rica is poised for a significant leap in its digital capabilities as the TAM-1 submarine cable project, a strategic venture between Trans Americas Fiber System (TAFS) and the state-owned Instituto Costarricense de Electricidad (ICE), enters. Limón, Costa Rica — LIMÓN - Costa Rica is poised for a significant leap in its digital capabilities as the TAM-1 submarine cable project, a strategic venture between Trans Americas Fiber System (TAFS) and the state-owned Instituto Costarricense de Electricidad (ICE), enters a critical deployment. Costa Rica 's internet connectivity relies on a network of submarine cables, which are underwater fiber-optic systems that handle almost all global data traffic. These cables ensure the country has reliable, high-speed internet, supporting businesses, remote workers, and the growing digital.
