

## Data Center EMS 20kW for Avionics

## Data Center EMS 20kW for Avionics

The Vertiv™ SmartRow™ 2 (SR2N05020FAA1) is a complete edge data center solution offering 20kW of IT load capacity across 5 IT racks. Engineered for high-density environments, it features integrated ...

In the US, the rapid deployment of new data center capacity is a strategic priority, but there is a major bottleneck: power availability. Demand for power is only growing, while the electricity grid is aging ...

Simplify the specification process for your standalone Edge Micro Data Center (MDC) application with Rittal's pre-engineered Liquid Cooling Package (LCP) platform designs.

20kW modular 3-phase UPS that includes power distribution and maintenance bypass in one NetShelter cabinet. Enter the total load (power draw) of all devices that will be protected by the UPS. This will be ...

Explore the capabilities below, as we invite you to join us in shaping the future of flight computing and avionics at the forefront of human spaceflight advancement.

When you work with GE Aerospace, Software as a Service, you work with a partner who has decades of aviation and data science expertise plus longevity in the market.

The XTreme EMS is a full-featured, full color Engine Monitoring System for just about any engine. Using an MGL Avionics RDAC for engine sender connection in the engine compartment, all sensor data is ...

The solution concept was inspired by high-heat flux cooling technology being developed for avionics applications. Oscillating heat pipes with key integration features will be developed for installation in ...

The Falken EMS is a stand-alone version of the EMS included with our FlightView EFIS. It supports full instrumentation for engines up to 8 cylinders and monitors over 30 engine parameters displayed on ...

Our systems are crafted to reduce pilot workload and support decision-making, making every flight safer and more efficient.
