

Do I need to change my router after getting fiber optic broadband from China Unicom

Overview

You can use your own router by disabling the ISP modem's Wi-Fi and ignoring its LAN ports, but the better solution is to replace the modem as well. This eliminates the ISP box entirely, giving you full control and ending rental fees. Check with your cable ISP for approved modem. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). Before purchasing a new replacement router for your cable modem, contact your ISP to inquire about any potential restrictions. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. You can do this by visiting internet service provider (ISP) websites or using online tools that check availability based on your.

Do I need to change my router after getting fiber optic broadband f

You can use your own modem or router for your home WiFi setup. It's as simple as pairing it with the existing equipment provided by your Internet Service Provider (ISP).
