H3c40ge optical module

The QSFP+ module is designed for use in 40GBASE Ethernet throughput up to 10km over single mode fiber (SMF) using a wavelength of 1310nm via duplex LC connectors.

The module converts 4 inputs channels (CH) of 10Gbps electrical data to 4 CWDM optical signals, and multiplexes them into a single channel for 40Gbps optical transmission.

It can connect a 40GE port to four 10GE ports using a 1-to-4 cable. The digital diagnosis function supports only temperature and voltage diagnosis.
