

How much does a prefabricated power distribution box for a data center cost

Overview

Q: What is the cost range for an E-House?

A: The cost for modular electrical buildings ranges from \$50,000–\$500,000+ per unit, with basic/single-section E-Houses around \$50,000–\$150,000 and large/custom/multi-room units from \$200,000–\$500,000+. Q: Can E-Houses be customized?

A: Yes! Accelerate AI data center deployment with a prefabricated modular pod—factory-built with power and cooling for scalable, high-density IT infrastructure. It supports up to 40+ high-density. A Prefabricated Power Distribution Center (PDC) is a modular, skid-mounted outdoor housing for auxiliary facilities and all switchgear equipment. The building is shipped with all equipment fully installed, interconnected, and tested by the manufacturer. Our cabinets have meshed doors and a robust six-brace design for superior load-bearing capacity. Ideal for your data center.
