

How to create a rendering of a communication cable tray

Overview

This Revit tutorial walks through setting up cable tray in Revit MEP, covering essential tools and techniques for your projects. Welcome back to the CAD Teacher VDCI video course content for the BIM 321 course, Introduction to Revit MEP. Sized for the cable fill of the runs it carries. Above lights, below ducts — coordinate with ceiling plenum. Noble Desktop's Revit MEP Certification Course covers Revit fundamentals — a strong foundation before specializing in mechanical. Quick and Accurate Generation of Cable Tray Sections and Feeder Cable Schedules. 'Cable Tray Sections Creator' is an innovative Add-in designed for Autodesk® Revit® software, aimed at swiftly generating cable tray sections along with integrated cable schedules. Paneldes Raceway software is for construction engineers. Modelling tools enable fast and efficient design of cable tray and conduit systems. Pre-definition of routing preferences enables fast and efficient design. With its intuitive interface and robust features, Revit streamlines design, offering enhanced customization. The course is designed to provide participants with the skills and knowledge necessary to create, modify, and document electrical systems in a building project using Revit.

Walk through placing cable tray in Revit MEP—loading fittings, setting routing preferences, drawing runs across floors, and resolving clashes with ducts and conduit.

Design 3D CAD models of plant tray, ladder, and raceway. Features include fast automated cable routing, length and fill calculations, interference analysis.

This lesson walks through how to start a project and properly set up for Electrical Cable Tray design in Revit 2025. It focuses on template selection, component availability, and basic setup steps.
