

Intelligent Technical Support for Optical Line Terminals

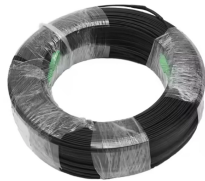

Overview

Transform your fiber network with high-performance carrier-grade optical line terminals that deliver greater programmability, flexibility, scalability, and open architecture. At the heart of a point-to-multi-point or passive optical network (PON) is the optical line terminal (OLT). Modern OLTs offer communication service providers (CSP) the ability to launch multigigabit services to tens of thousands of subscribers from a single location or just ten. Fiber-to-the-home. Field-proven EPON and 10G-EPON OLT SoC solutions Cortina family of Optical Line Terminal (OLT) SoCs completes the end-to-end solutions for EPON and 10G-EPON applications. Full PON port flexibility enables support of Combo PON, G-PON, and XGS-PON on any port for residential, cloud, and business.
