

Internet-based New Energy and Environmental Protection Projects

Internet-based New Energy and Environmental Protection Projects

These projects merge technology and sustainability to provide real-time, scalable solutions for environmental conservation, using modern tools like IoT, AI, blockchain, and GIS.

IoT-based environmental monitoring offers innovative ways to manage environmental challenges. Learn how these solutions increase safety and drive business growth.

From green materials to sustainable energy, these environmental startups will motivate you to be more eco friendly and make the world a better place.

Welcome to UNEP's Digital Accelerator Lab. This is a space where we showcase the power of digital and data to achieve environmental goals. From prototypes to the latest reports, delve ...

Therefore, this review aims to explore recent advancements in using AI, sensors and IOTs for environmental pollution monitoring, taking into account the complexities of predicting and ...

Take a virtual tour of five remarkable renewable energy projects around the world, each showcasing innovative technology, ambitious scale and a commitment to a cleaner, more ...

Explore with Beetroot how IoT is revolutionizing clean energy tech, enhancing infrastructure monitoring, energy management, and environmental conservation with real-time data ...

The research article presents an Artificial Intelligence (AI) and Internet of Things (IoT)-based framework designed to evaluate contemporary research prototypes in energy preservation.

Key features of the energy internet such as energy sources, communication technologies, data computation, energy management systems and financial analysis are highlighted to enhance ...

This report explores the interconnectedness of rapid digitalization and the urgent need to foster environmental sustainability against a backdrop of growing inequality and vulnerabilities, such as ...

Environmental degradation exacerbates the frequency and impact of droughts, floods, forest fires and other natural hazards. Let us explore how IoT is making a positive impact on ...
