

# Is it necessary to install an optical module socket

## Overview

Yes, a fiber wall outlet socket is highly recommended for FTTH installations. It ensures that your fiber optic cables are terminated securely and provides an easy way to connect your devices to the fiber network. It ensures a clean, stable interface between the ISP's fiber network and your router—impacting speed, latency. Secure Physical Housing: Precisely holds the SFP module in place. Function: Converts optical signals from the ISP. When it comes to ONT installation, you've got two main options: Indoor ONTs are installed inside your home, typically in a utility room, basement or another centralized spot. Let's take a closer look at the fiber to the home equipment you'll need and answer some of the most common questions about.
