

# **ONT Optical Network Terminal Smart RoHS**

## ONT Optical Network Terminal Smart RoHS

The Huawei OptiXstar EG8145X6-10 is an intelligent GPON and Wi-Fi routing-type ONT. It uses the GPON Wi-Fi technology to implement ultra-broadband access, high performance and wide coverage ...

Network Access Control (NAC) enables individual user service profiles to automatically follow a user to any port on the Tellabs® Optical LAN system, including service profile and security settings

Indoor installation offers a range of mounting options including: the standard enclosure for added security and protection; a wall mount bracket for indoor cabinets and indoor wall mounts; a multi ...

Discover our selection of GPON, EPON, and XG (S)PON ONT/ONU devices. Choose from reliable Optical Network Terminals for seamless connectivity and efficient network solutions.

In parallel, we are actively developing next-generation products, including higher-rate ONT networking products and AI Smart Terminals with integrated computing power.

Our integrated circuits and reference designs help you create optical network terminal (ONT) units that enable high-speed data connections for today's passive optical networks.

Our SDX 600 Series offers a comprehensive range of GPON optical network terminals (ONTs), from feature-rich, multiport solutions to ultra-compact, pluggable SFPs.

Explore Optical Network Terminals (ONT), their functions, and how they support efficient, high-speed connectivity in modern fiber networks.

ONT stands for Optical Network Terminal. It is the final endpoint device in a Fiber-to-the-Home (FTTH) network, translating light pulses from the fiber optic line into electrical Ethernet signals.

The Tellabs 140CL Optical Network Terminals (ONTs) provide high-density Gigabit Ethernet connectivity that is a scalable and smart choice for the new enterprise LAN.
