

Original Color Distribution Box

Overview

Recognizing a need in schools for safe and affordable wax crayons, Binney & Smith created the first box of eight Crayola Crayons in 1903. Sold for a nickel, this box included red, orange, yellow, green, blue, violet, brown, and black. Which color distribution are you comparing to?

M&M's Milk Chocolate M&M's (Cleveland, TN) Skittles Froot Loops For a more detailed discussion, see the description in *The Practice of Statistics*, *Statistics and Probability with Applications*, *Introductory Statistics: A Student-Centered Approach*, or. Many introductory courses in probability and statistics encourage students to collect and analyze real data. A popular experiment in categorical data analysis is to give students a bag of M&M® candies and ask them to estimate the proportion of colors in the population from the sample data. In some. This imbalance has led many candy lovers to wonder—why doesn't Mars Wrigley, the company that makes M&Ms, produce them with an equal ratio of colors?

There are several factors that contribute to the uneven distribution of M&M
