

Polish active optical modules with anti-electrocution features available now

Polish active optical modules with anti-electrocution features available

The monitoring product family includes advanced modules such as OCM and OTDR, as well as simpler pigtail integrated PD, tap or WDM PD in single-channel and array packages.

Seven of them will be represented at LASER 2022 on the Polish joint booth (Hall B4.431). In parallel, the individual exhibitors Solaris Optics, Perspectiva Solutions and VIGO Photonics will have their own ...

During this year's MSPO 2024, the optical communication system demonstrated by CRW Telesystem-Mesko is making its debut. This system also has additional functions related to ...

1075KWHH ESS

High-Quality Epi Wafers -A wide range of high-quality III-V epi-wafers for advanced photonics and electronics, available in both large volumes and small test batches.

OPTOMER is a polish producer of a wide range of passive optical components. Over twenty five years of experience in the telecommunications market.

The set includes reconnaissance modules including a daylight camera and an infrared camera, seismic sensors, communication module with a tripod, a command and control station, a set of batteries and ...

Since 2021, VIGO Photonics has been working with various Polish institutes to develop its first mid-infrared PIC on the market, targeting applications like miniature gas sensors, medical...

Poland's Largest 100G Coherent Module Deployment Nearly 300 coherent QSFP28 100G 0 dBm modules by GBC Photonics were deployed in the Orange Polska network — the largest ...

To accommodate both high-power optical and dense copper solutions, the specification will define separate but compatible heatsink specifications for both optical and copper modules, allowing ...

We are one of the largest technological integrators in the field of optical fibre systems for the construction of optical teletransmission networks in Poland.
