

Real-time monitoring of network patch panels

Real-time monitoring of network patch panels

By equipping patch panels with a means to detect when and where connections are made, it is possible to monitor and record the status of port connections in real time.

MapIT G2 integrates the powerful combination of innovative Smart Patch Panels, user-friendly Master Control Panels and EagleEye™ software to provide real-time tracking and reporting of network-wide ...

Panduit's PViQ™ System Hardware, which includes intelligent patch panels, modules, and cabling, seamlessly feeds information directly into the Physical Infrastructure Manager™ (PIM™) Software ...

What is Intelligent Patching? At its core, intelligent patching automates and monitors patch cord connections between switches, servers, and patch panels. It forms the foundation for real-time ...

What is Intelligent Patching? At its core, intelligent patching automates and monitors patch cord connections between switches, servers, and patch panels. It forms the ...

Telescent offers a robotic patch panel system that can remotely reconfigure network connections and includes both power monitoring and an optional optical time domain reflectometer ...

This is where FUTURE-PATCH comes in and enables complete monitoring of the patching area in network racks. The real-time monitoring of all actual port states is realised by intelligent electronics ...

With continuous patching metrics and network monitoring, Patch Manager Plus can help find all missing patches and vulnerable systems on your network and provide the information needed to make your ...

Belden PatchPro® offers a complete intelligent ready physical layer management system that uses RFID (radio frequency identification) technology for wireless identification of individual patch cords ...

Infinique's Intelligent Patch Panel Solution for Copper and Fiber Structured Cabling System provides an automated and versatile remote management of ICT infrastructure.

SMARTPATCH provides simple and controlled management and recording of common network changes such as those resulting from office moves and terminal additions. The system also gives multisite ...
