

Recommended Cold Aisle Cabinet Heightening Solution

Overview

TechnoGuard's Containment Solutions improve airflow efficiency delivered to IT equipment, improve energy efficiency and drive operational costs down. We provide the best solution to eliminate hot and cold air from mixing between aisles regardless of rack configuration and other design. Effective aisle containment is critical to maintaining peak data center cooling efficiency. Exhaust air. Freestanding, Rack-independent system with the flexibility to maximize efficiency and capacity from the core to the edge for raised floor and slab data centers. Adaptable to hot and cold aisle containment, the Vertiv Aisle Containment system allows you to deploy containment before or after racks. To increase the "Energy Efficiency" and manage the "Physical Security & Access Control" in data center environments, KabinPLUS offers Data Center Aisle and Containment Solutions. It allows high rack density and also greatly reduces energy cost in long run.

Recommended Cold Aisle Cabinet Heightening Solution

Depending on your facility's layout, Armstrong Aisle Containment Solutions offer both Hot Aisle Containment (HAC) and Cold Aisle Containment (CAC) systems to suit new builds or retrofit ...

Our modular Cold Aisle Containment System is engineered to tackle the toughest challenges facing modern facilities, from rising cabinet densities and shrinking budgets to airflow inefficiencies and ...

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

Explore sliding and swinging options for cabinet-to-cabinet and cabinet-to-wall applications. Our easy-to-install doors are offered up to 102" high and available in single and dual openings.

High energy costs and accelerated energy consumption has forced data center managers to implement strategies to achieve separation between the hot and cold air in the data center.

Cold Aisle Containment for rack cabinets with single or double sliding doors and sliding roof frame units fabricated out of aluminium, with polycarbonate panel material and fire nozzle entry sections.

A cabinet supported cold aisle containment solution consists of aisle-end doors and roof system to prevent the cold air in aisle mixing with the hot air. With the help of sealing accessories, cooling ...

The goal of a hot or cold aisle configuration is to conserve energy ...

We provide the best solution to eliminate hot and cold air from mixing between aisles regardless of rack configuration and other design challenges. Whether it's live environment or new construction, ...

Standard sizes fit common aisle widths and heights while custom widths and heights can be easily accommodated. Can be easily assembled directly out-of-the-box with a single hand tool; attaches ...

The goal of a hot or cold aisle configuration is to conserve energy and lower cooling costs by managing air flow. Designing the proper containment system requires lining server racks in rows (or aisles) with ...
