

# Red dots appear on the fiber optic cable of the router

## Overview

A red LOS (Loss of Signal) light on a fiber modem indicates no optical signal reception, often due to fiber cable damage or loose connections. Verify that the optical transceiver is clean and properly. How to FIX the Loss of Signal Error Is your router's LOS (Loss of Signal) or Optical light blinking red or solid red?

This means your internet is down. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light. If OFF: The router is not powered — check the socket, adapter, or power cable. Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes.
