

## Secondary distribution boxes must be enclosed

### Overview

Electric equipment shall be installed in a neat and workmanlike manner. (i) Unused openings in boxes, raceways, auxiliary gutters, cabinets, equipment cases, or housings shall be effectively closed to afford protection substantially equivalent to the wall of the equipment. secondary unit substation is a close-coupled assembly consisting of enclosed primary high voltage equipment, three-phase power transformers, and enclosed secondary low-voltage equipment. The rule states the width must be the greater of either 762 mm (30 inches) or the width of the equipment itself. Use of the copyrighted material apart from this UFC must have the permission of the copyright holder. 22 and updated reference to IEEE C57. These regulations are contained in §§ 1910. Article 314 applies to: These. Primary distribution systems consist of feeders that deliver power from distribution substations to distribution transformers.
