

Server network port optical module

Server network port optical module

Discover high-performance fiber optic network interface cards for servers and desktops. Find single and dual port SFP+ adapters with reliable connectivity.

Offering 10GbE, 25GbE, 40GbE, and 100GbE dual-speed optical transceivers, customers with high-bandwidth applications can seamlessly transition servers to higher speeds.

Maximize port utilization and simplify cabling with 100G breakout-capable modules and QSFP28 cables, providing scalable, multi-speed connectivity for modern AI, cloud, and HPC networks.

OM3 Fiber Patch Cable Family

SFP+ modules are commonly used for inter server connections in data center networks, as well as connections between servers and network switches. It supports single-mode and multi-mode optical ...

Optical transceivers are the backbone of modern networking. These compact, hot-swappable modules plug into switches, routers, and servers to enable high-speed data transmission ...

5G Backhaul Module For Brocade For Finisar
Network Card FC Port Blade GPU SAMSUNG
Memory HDD Topstar -- Your Excellent One-stop
Optical Network Transceiver Manufacturer in the
World ...

In this way, the server can realize fiber
interconnection with switches. Figure 2 Intel X520
Series Network Adapter From the above
introduction, we know that the optical modules
used on servers are ...

Network upgrades are also made easier because
SFPs are interchangeable fiber connectors that can
adapt to any existing network. For example, by
simply replacing the pluggable optical transceiver,
a ...

Read the definitive 2026 guide on SFP modules.
We explain Single Mode vs Multimode, DDM
diagnostics, and how to choose the right
transceiver for Cisco, Juniper, and more.

An SFP (Small Form-factor Pluggable) is a
compact, hot-pluggable transceiver module that
allows networking equipment — including
switches, routers, servers, and media converters
— to ...
