

State Grid Energy Internet Construction

Overview

Construction began Thursday on State Route 67 near Poway in San Diego County, where Newsom Administration officials gathered as 500 feet of fiber optic cable was blown through conduit in the first segment of a massive, \$3.8 billion statewide project known as the “Middle Mile”. SACRAMENTO - By the end of this year, more than 3,000 miles of the backbone “middle mile” broadband network will be under construction and expansion, paving the way to connect millions of Californians to high-speed internet. This publicly funded, owned and open-access network is set to be the. Although the long-term market outlook remains uncertain, the Lawrence Berkeley National Laboratory predicts that data center demand will grow from 176 terawatt hours (TWh) in 2023 (or, about 4. electricity consumption) to between 325-580 TWh (6.1 In some parts of. We understand that our infrastructure projects may affect the neighboring communities. We believe in open and ongoing communication with you and your community. (October 13, 2022) - Construction began Thursday in rural San Diego County on the first leg of the 10,000-mile broadband network aimed at bringing high-speed internet services to all Californians so they can access emergency information, telehealth services,

education, and.
