

while larger servers and. Many rack-mountable servers offer the option to be mounted using rails. In this configuration, a pair of standard rails are mounted to the rack, screwed into all four posts, and then the server, which has the corresponding rails mounted on the sides, slides into the rack, just like a drawer going into a cabinet. This provides additional server stab. Where you plan to install your rack will also impact what kind of rack you choose and may even limit your choices. You'll not likely be picking up a full-sized 42U rack if you only have a cubbyhole available, and you may not want an open rack if you're installing it in an area that's more highly trafficked, like a photocopier room or supply room. M.
